

It's that time again...

Time to aerate  
and re-seed  
your fescue lawns!

**Aeration, Seeding, Fertilizing and Liming** are the most important service programs to keep your fescue lawn in good shape.

As with all our services, we provide quality application at excellent rates.

**Now through Mid-October** is the optimal time period for these lawn treatments. We will be glad to advise you on the specific needs of your yard.

Please contact the office NOW to be added to our fall aeration schedule.
